

A CRM APPLICATION TO MANAGE THE BOOKING OF CO- LIVING

Name: sripuram akhila

EMAIL: akhila sripuram6@gmail.com

PROJECT ABSTRACT:

The Co-living space project aims to create a vibrant and inclusive community where individuals can live, work, and connect with like-minded people. We believe that living together in a shared environment fosters collaboration, reduces isolation, and enhances the overall quality of life.

The co-living space will feature a carefully designed layout that balances privacy and communal areas. Co-living Space is an application where customer details are stored in order to choose the different AC rooms with multiple sharing. Special food items will be selected by the user in daily and make payments in different modes. And also give the feedback of the service like room cleaning, internet connection and foods etc...

TASK 1-Salesforce

Introduction:

Are you new to Salesforce? Not sure exactly what it is, or how to use it?

Don't know where you should start on your learning journey?If you've answered yes to any of these questions, then you're in the right place.This module is for you.

Welcome to Salesforce! Salesforce is game-changing technology, with a host of productivity-boosting features, that will help you sell smarter and faster. As

you work toward your badge for this module, we'll take you through these features and answer the question, "What is Salesforce, anyway?".

What Is Salesforce?

Salesforce is your customer success platform, designed to help you sell, service, market, analyze, and connect with your customers.

Salesforce has everything you need to run your business from anywhere. Using standard products and features, you can manage relationships with prospects and customers, collaborate and engage with employees and partners, and store your data securely in the cloud.

So what does that really mean? Well, before Salesforce, your contacts, emails, follow-up tasks, and prospective deals might have been organized something like this: <https://youtu.be/r9EX3lGde5k>

Activity 1- Creating Developer Account

Creating a developer org
in salesforce.

1. Go to <https://developer.salesforce.com/signup>
2. On the sign up form, enter the following details:

3. Company : College Name
4. Country : India

5. Postal Code : pin code

Activity2- Account Activation

1. Go to the inbox of the email that you used while signing up. Click on the verify account to activate your account. The email may take 5-10mins.

2. Click on Verify Account

3. Give a password and answer a security question and click on change password.

Change Your Password

Enter a new password for lead@sb.com.
Make sure to include at least:

- 8 characters
- 1 letter
- 1 number

* New Password
..... Good

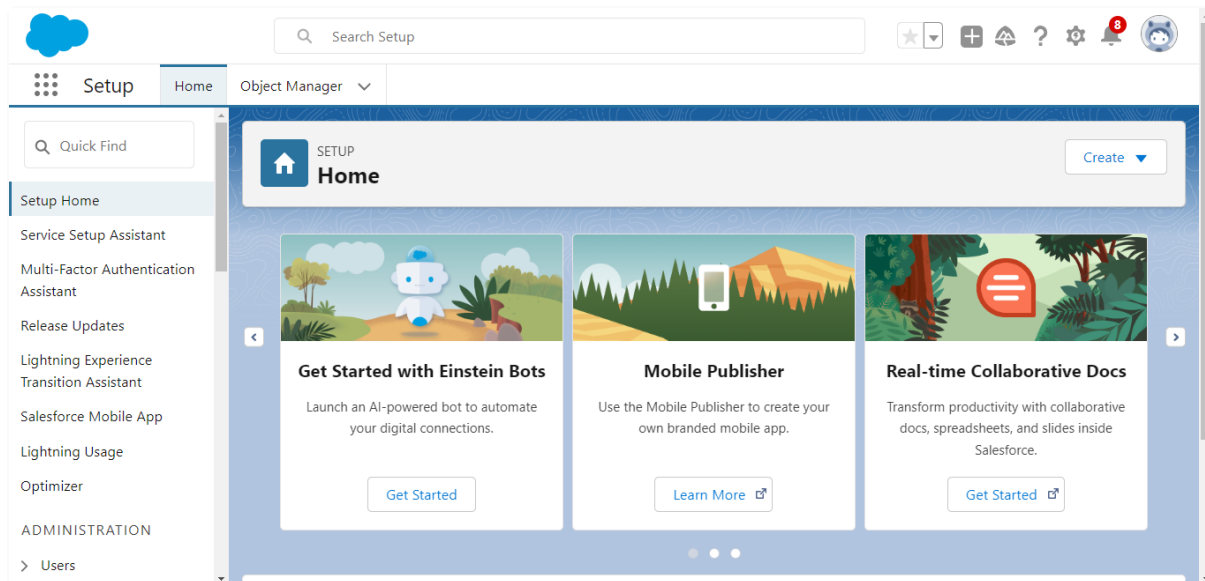

* Confirm New Password
..... Match

Security Question
▼ In what city were you born?

* Answer
asdfghjkl

Change Password

4. when you will redirect to your salesforce setup page.

TASK 1-Object

What Is an Object?

Salesforce objects are database tables that permit you to store data that is specific to an organization. What are the types of Salesforce objects

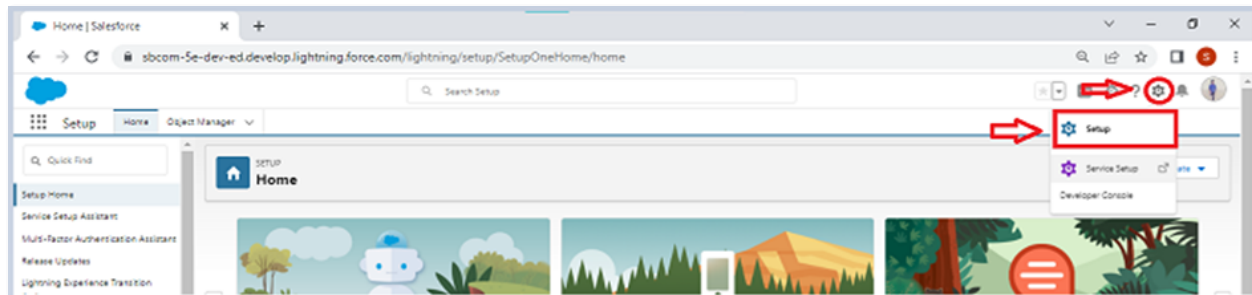

Salesforce objects are of two types:

1. **Standard Objects:** Standard objects are the kind of objects that are provided by salesforce.com such as users, contracts, reports, dashboards, etc.
2. **Custom Objects:** Custom objects are those objects that are created by users. They

supply information that is unique and essential to their organization. They are the heart of any application and provide a structure for sharing data.

To Navigate to Setup page:

Click on gear icon ? click setup.

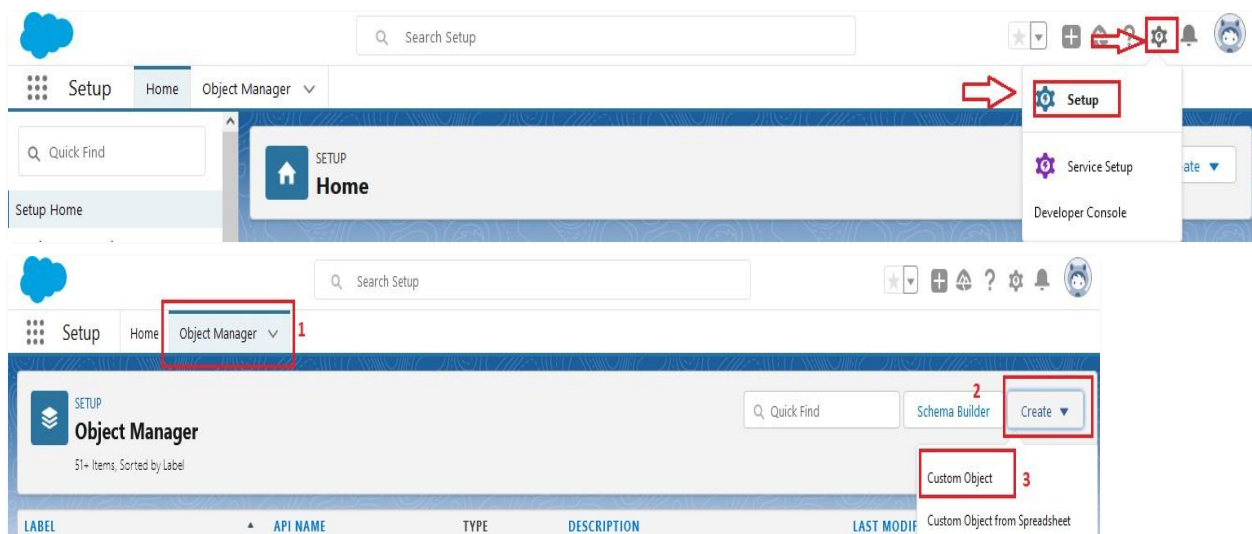

Objects and fields involved in Co-Living:

TASK1 - Create a custom object for Total Rooms

Create a custom object for Total Rooms:

To create a custom object, follow these steps:

1. From setup click on object manager.
2. Click create, select custom object.

3. Fill in the label as " Total Room ".
4. Fill in the plural label as " Total Rooms ".
5. Record name: "Total No Of Rooms"

12. In the Object Creation Options section, select Add Notes and Attachments related list to default page layout.
13. Leave everything else as is, and click Save.

TASK3 - Tab

What is Tab: A tab is like a user interface that is used to build records for objects and to view the records in the objects.

Types of Tabs:

1. Custom Tabs

Custom object tabs are the user interface for custom applications that you build in salesforce.com. They look and behave like standard salesforce.com tabs such as accounts, contacts, and opportunities.

2. Web Tabs

Web Tabs are custom tabs that display web content or applications embedded in the salesforce.com window. Web tabs make it easier for your users to quickly access content and applications they frequently use without leaving the salesforce.com application.

3. Visualforce Tabs

Visualforce Tabs are custom tabs that display a Visualforce page. Visualforce tabs look and behave like standard salesforce.com tabs such as accounts, contacts, and opportunities.

4. Lightning Component Tabs

Lightning Component tabs allow you to add Lightning components to the navigation menu in Lightning Experience and the mobile app.

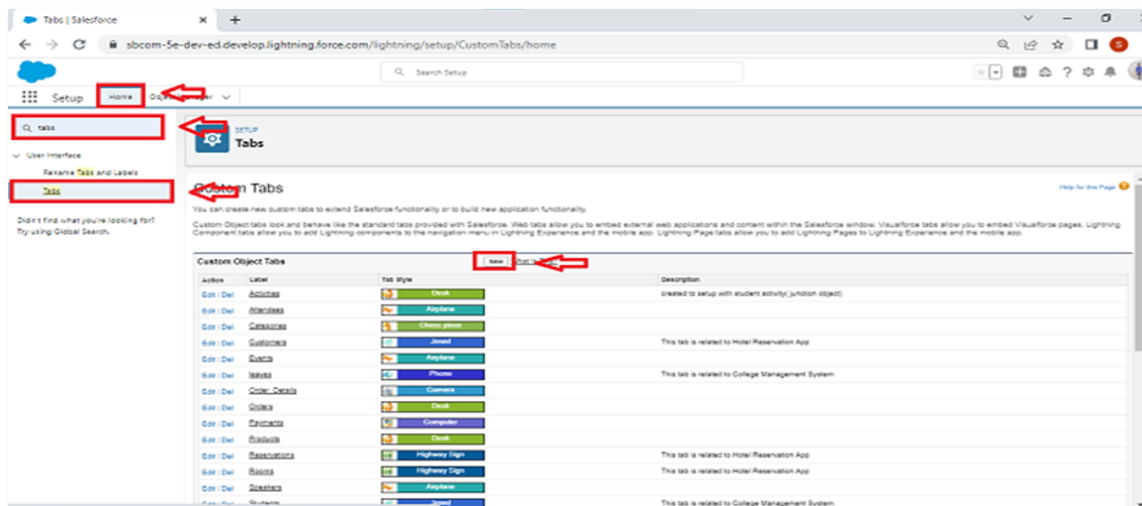

5. Lightning Page Tabs

Lightning Page Tabs let you add Lightning Pages to the mobile app navigation menu.

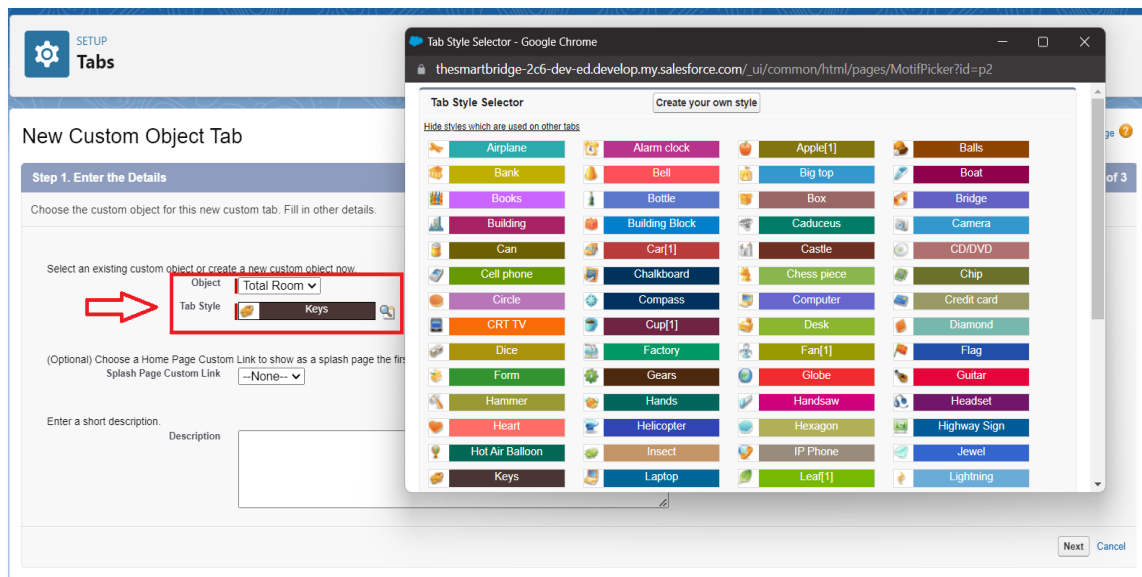

ACTIVITY 1-Creating a Tab for Total Rooms

To create a Tab:(Total Rooms)

1. Go to setup page > type Tabs in Quick Find bar > click on tabs > New (under custom object tab)

2. Select Object(Total Rooms) > Select the tab style.

3. Next (Add to profiles page) keep it as default

ACTIVITY 2 - Create a Tab for Customers

To create a Tab:(Customers)

1. Go to setup page > type Tabs in Quick Find bar > click on tabs > New (under custom object tab)
2. Select Object(Customers) > Select the tab style > Next (Add to profiles page) keep

it as default > Next (Add to Custom App) keep it as default > Save.

ACTIVITY 3 -To create a Tab for Room Bookings

To create a Tab:(Room Bookings)

1. Go to setup page ? type Tabs in Quick Find bar ? click on tabs ? New (under custom object tab)
2. Select Object(Room Bookings) ? Select the tab style ? Next (Add to profiles page) keep it as default ? Next (Add to Custom App) keep it as default ? Save.

ACTIVITY 4 - Create a Tabs For Remaining Objects

Now create the tabs for Payments, Food Selections, Feedbacks Objects.

TASK 4 - The Lightning App

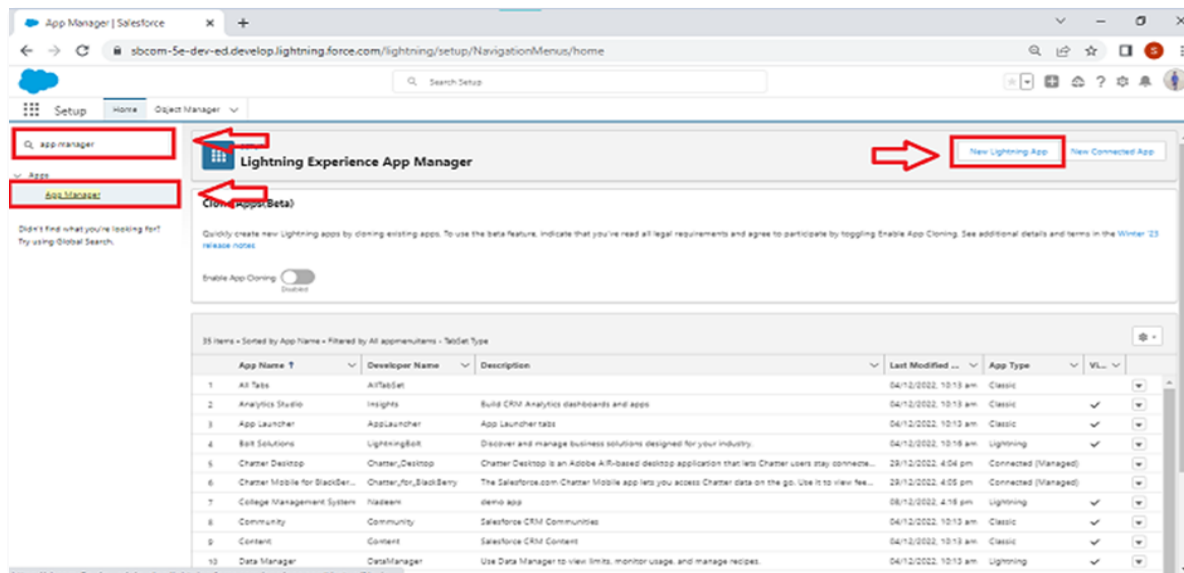

An app is a collection of items that work together to serve a particular function. In Lightning Experience, Lightning apps give your users access to sets of objects, tabs, and other items all in one convenient bundle in the navigation bar.

Lightning apps let you brand your apps with a custom color and logo. You can even include a utility bar and Lightning page tabs in your Lightning app. Members of your org can work more efficiently by easily switching between apps.

TASK 1- Create a Lightning App

To create a lightning app page:

1. Go to setup page > search “app manager” in quick find > select “app manager” > click on New lightning App.

2. Fill the app name in app details and branding > Next > (App option page) keep it as default > Next > (Utility Items) keep it as default > Next.

The screenshot shows the 'New Lightning App' setup page, specifically the 'App Details & Branding' section. The 'App Name' field is highlighted with a red box and an arrow. The 'Next' button is also highlighted with a red box and an arrow.

App Details

- *App Name: Name your app...
- *Developer Name: Enter a developer name...
- Description: Enter a description...

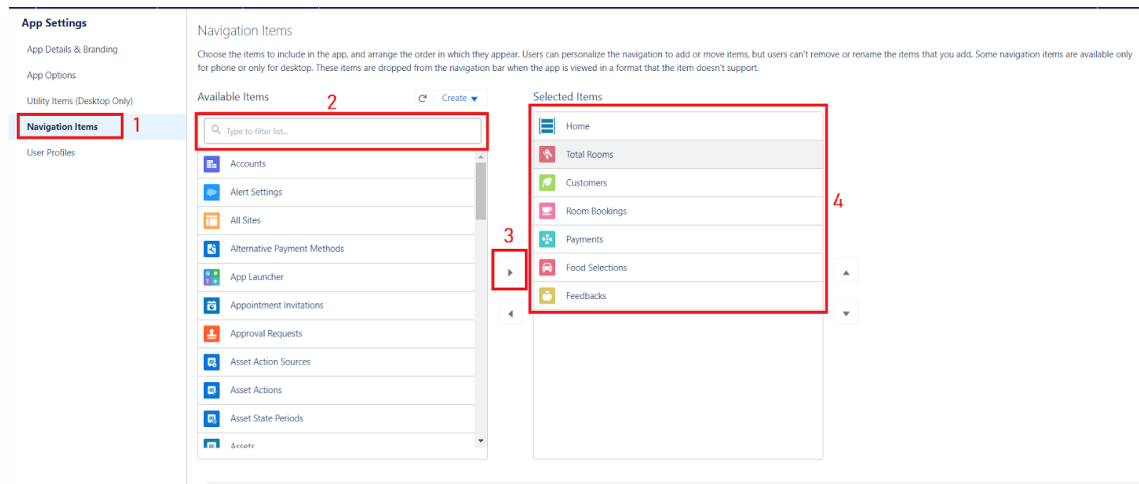

App Branding

- Image: Upload
- Primary Color Hex Value: #007002
- Org Theme Options: ☐ Use the app's image and color instead of the org's custom theme

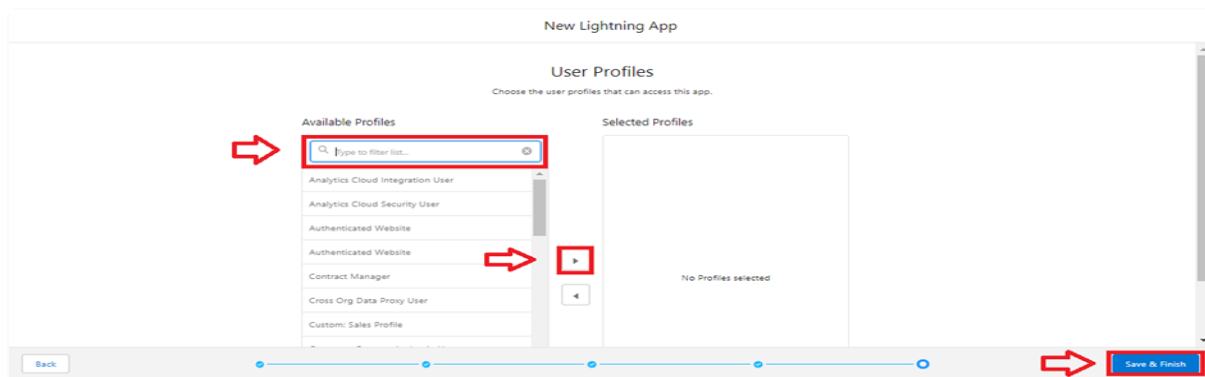

App Launcher Preview

Next

3. To Add Navigation Items: Ctrl and Select the items (Total Rooms, Customers1, Room Booking, Payments1, Food selection, Feedbacks, Reports and Dashboards) from the search bar and move it using the arrow button > Next.

4. To Add User Profiles:

5. Search profiles (System administrator) in the search bar > click on the arrow button > save & finish.

THANK YOU
